Workshop title:

If you agree to the value, you can identify with it!

Duration of the workshop: 2x 1h 45 min

Goal of the workshop:

Broaden ethical insights and creating new perspectives by adding values to this new time period.

Concept:

Participants are invited to bring a moral dilemma to the workshop they recently have experienced in their supervision practice. To get more background information and next steps towards handling the dilemma, we will work with the constellation format of the tetralemma. In a second step we will continue with the dilemma method of ethical reasoning to recognize next steps towards answers. After the break we will keep on finding new values using creative work, reflection, small group dialogue and the ANSE code of ethics.

Learning outcome:

Participants

- Gain insight in their own values as part of their identity
- Understand their ethical attitude
- Learn and practice new perspectives
- Experience constellation work with a moral dilemma
- Experience ethical reasoning using the dilemma method
- Create awareness about the necessity of having a multi-perspective view on a moral dilemma
- Are able to create new values

Profile

Barbara De Dominicis Ebetsberger

Barbara De Dominicis Ebetsberger has worked for years as supervisor, coach and psychologist in Italy and abroad. As an experienced systemic- structur facilitator she supports leaders, teams and organizations to bring up their full potential. In her work she combines theoretical knowledge and inner wisdom to empower aspects of self-awareness in the persons and creating new ways for enterprises to follow self-organizing principles.
